Based on the same principle as human touch, massage is the oldest method of promoting good health, suppleness and strength.

Today, the role of massage therapy is recognized by the general public and other

health care professionals as being an effective health care alternative.

Due to public perception and desire, massage therapy has grown into a more prominent position.

It is a viable and respected profession promoting good health not only for your physical but emotional well being also.

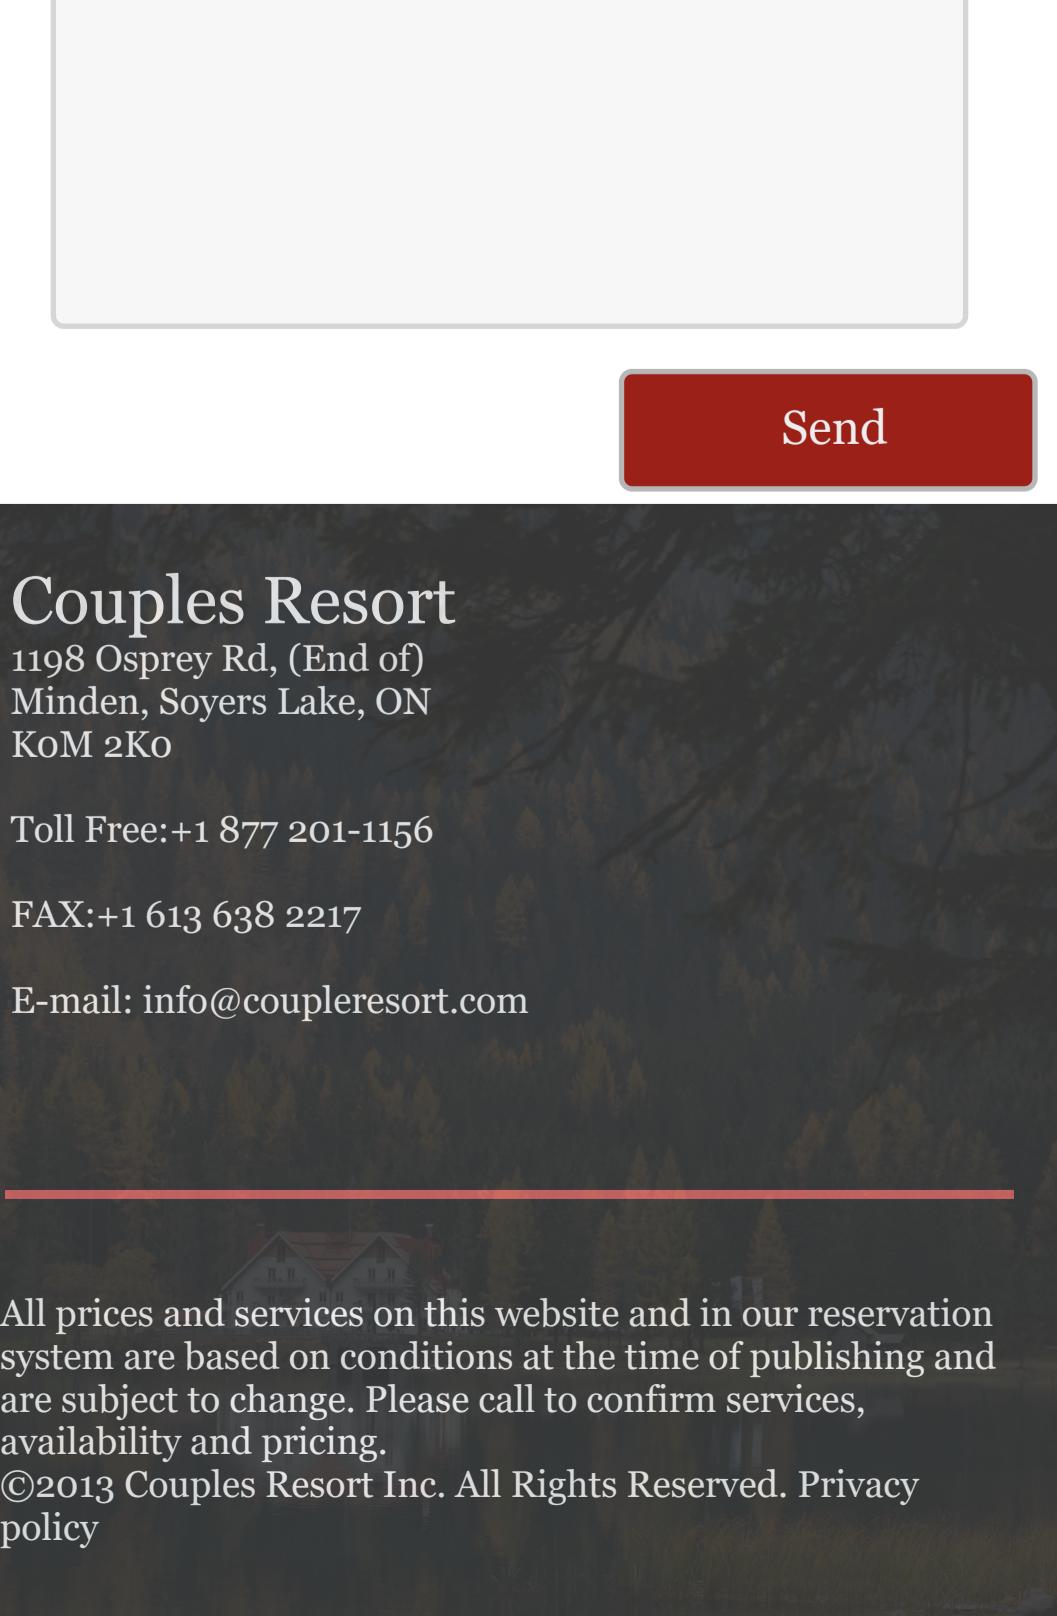

Massage Therapy is the kneading, manipulation or application of methodical pressure and friction of the body.

Whether it is for treatment of injury, stress or for relaxation, the skilled use of massage through touch is used to maintain and enhance

the health and well being of the entire body.
